IC - ICM A61K031/465

ICS A61K031/195

CC - 63-6 (Pharmaceuticals)

FAN.CNT 1

PATENT NO. KIND DATE APPLICATION NO. DATE

PN - ES2091724 A 19961101 ES 1995-703 19950407

ES2091724 B 19970601

AB - A lotion contg. EtOH 60-100, H₂O 10-50 mL, arginine 50-600, keratin hydrolyzate 100-1000, nicotinic acid 200-2000, and essences 5-30 mg is applied to the beard region of the face of men to enhance sexual desire and potency. Absorption of the active agents through this porous region of the face results sequentially in stimulation of the pituitary to secrete gonadotropin, testosterone secretion by the testes, dopamine and noradrenaline secretion by the hypothalamus, and sexual arousal.

ST - aphrodisiac arginine keratin hydrolyzate nicotinate; sexual potency arginine keratin hydrolyzate nicotinate

IT - Sexual behavior

(aphrodisiacs for; lotion for potentiating sexual capacity in men)

IT - Keratins

RL: BAC (Biological activity or effector, except adverse); BSU (Biological study, unclassified); THU (Therapeutic use); BIOL (Biological study); USES (Uses)

(hydrolyzates; lotion for potentiating sexual capacity in men)

IT - Sexual behavior

(impotence, treatment; lotion for potentiating sexual capacity in men)

IT - 59-67-6, Nicotinic acid, biological studies 74-79-3, Arginine, biological studies 98-92-0, Niacinamide 1987-71-9, Niacinamide ascorbate

RL: BAC (Biological activity or effector, except adverse); BSU (Biological study, unclassified); THU (Therapeutic use); BIOL (Biological study); USES (Uses)

(lotion for potentiating sexual capacity in men)
